Description of Accident:

What to do if you are involved in an auto accident?

1. Find out if anyone is injured. Call for help if people are injured and avoid moving a severely injured person.
2. Protect the scene. Try to keep things as they are. It is very important to keep yourself, others, and your car from further damage. Set up flares, get off the road, etc.
3. Collect information. Get pictures (if possible and safely). Using this form, gather names, addresses, witness information, insurance information, driver license information, etc. Don't be afraid to point out anything unusual about how the accident occurred. Many accidents are caused intentionally. Tell law enforcement. Don't confront the individual. Write down everything you can remember while it's still fresh in your mind.
4. Finally, get in touch with your company as soon as possible. Many companies have written procedure to help with your report and assessment.
